

Metal Master – Time Investment Verification Sheet

Owner: Ryan Burbank

Business Name: Metal Master

Contribution Type: Sweat Equity / Labor Investment

This document outlines the time-based investment contributed to the development of Metal Master. All work listed below was performed directly by the owner without financial compensation.

Estimated Time Contributed:

- 1,000+ hours over 12+ months

Major Development Milestones Completed:

- Full backend API (Express + Supabase)
- Web app (Next.js) and mobile app (React Native + Expo)
- Guitar Pro tab engine with beat sync, looping, mixer, and speed control
- AI tone engine implementation
- Stats, achievements, practice sessions, and progression logic
- Jam track system and daily riff engine
- Shared TypeScript types and Zod validation schemas
- Database migrations and RLS security
- Cross-platform UI framework

Additional Contributions:

- Branding and visual design direction
- App architecture and infrastructure setup
- Testing, debugging, and polishing of all core features

This work constitutes a substantial non-financial investment into the business and satisfies the “owner contribution” requirement through labor and intellectual property creation.

Signed,

Ryan Burbank
